DETAILED ACTION

1. Claims 1-19 are pending in the application and are currently subject to restriction.

Election/Restrictions

2. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-17, drawn to a nucleic acid molecule, a vector comprising said nucleic acid molecule, and a host cell comprising said vector.

Group II, claim(s) 18, drawn to a method for identifying a cell line comprising contacting a polypeptide with a test culture and determining the quantity of cells of the test culture that have undergone apoptosis.

Group III, claim(s) 19, drawn to a method for identifying an agent comprising exposing a test culture to a candidate agent and determining the quantity of cells of the test culture that have undergone apoptosis.

3. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature of group I is a nucleic acid molecule.

The special technical feature of group II is contacting a polypeptide with a test culture and determining the quantity of cells of the test culture that have

Art Unit: 1642

undergone apoptosis to identify a cell line that undergoes apoptosis upon interacting with the polypeptide.

The special technical feature of group III is exposing a test culture to a candidate agent and determining the quantity of cells of the test culture that have undergone apoptosis to identify an agent capable of inhibiting or enhancing apoptosis.

Accordingly, groups I-III do not share the same or corresponding special technical feature so as to form a single general inventive concept under PCT Rules 13.1 and 13.2. In addition, PCT Rules 13.1 and 13.2 do not provide for a single general inventive concept to comprise more than the first mentioned product, the first mentioned method for making said product, and the first mentioned method for using said product.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen L. Rawlings, Ph.D. whose telephone number is (571) 272-0836. The examiner can normally be reached on Monday-Friday, 8:30AM-5:00PM.
